

Project 100 Tries For Centennial Money

A campus initiated group with a proposal for an Environmental Centre is bucking for some of the Greater Victoria Centennial '71 money.

Environment 100 is the code name for the project which is being put forward by the Citizen's Committee for an Environmental Centre.

The centre has been formally proposed as a capital region Centennial '71 project and the Greater Victoria Centennial Committee is expected to reach a decision soon on how to spend the money.

The amount of money available is approximately \$175,000. The CCEC was formed in May following the Biology Club Teach-In on campus held earlier this year. The committee's membership of about 60 includes persons representing a broad segment of the community and according to organizers is growing daily.

The committee operates an information and publicity office in Clubs C of the SUB.

The brief submitted to the Centennial '71 committee says Victorians are genuinely concerned about the quality of their environment but are frustrated by lack of information and conflicting opinion.

"There is no place to go for objective information, no source to guide the average citizen on environmental issues, few outlays for volunteer activity for the many who wish to work for high quality environments in Victoria," it states.

"Pollution, depletion of natural resources, overpopulation, deterioration of the city environment are world-wide problems often requiring regional solutions."

The brief says people need "information, education, communication and opportunity for involvement."

The proposed Centre for environmental information could:

Council Piles Up Debts

The AMS of the University of Victoria is expected to have a budget deficit of over \$18,500 for the 1969-1970 fiscal year.

The deficit is mainly the result of various projects and new policies undertaken by the student Councils of both Norman Wright and Bob McDougall after the budget for the fiscal year was approved in October of 1969.

The Society has been hindered in its financial matters by the absence for the summer of Treasurer Gary Zak and the recent resignation of the Society's Business Manager Dick Chudley.

Deryk Thompson, Publications Director, has assumed the burden of Interim Treasurer and has announced a policy of "fiscal restraint".

The main causes of the huge deficit have been the additional \$3000 subsidy required by the Martlet, the \$3000 loss suffered by the SUB cafe, a \$2000 grant to the Indian Student Federation for a summer symposium, and a new AMS policy of paying executive members.

For the summer of 1970 four members of the Executive Council have been hired to work for the A.M.S., in addition to the President.

Another member is to be hired for the month of August while a sixth will be employed for the final two weeks of August.

Mike Farr, an R.A. member who was instrumental in recommending the new policy, says "the main purpose (of paid Executive members) is to provide a meaningful and worthwhile program for the students next fall." Cost of the program will be \$4900.

When asked of his views concerning the deficit, Dave Allen, former Activities Co-ordinator, replied that the Council did not keep a close check on the books and such items as the Martlet subsidy could have been avoided.

Greg Fraser, Communications Director, felt that the new Council has been "slack in its fiscal policies."

Campus Cops Forget Parking At Convention

Campus police throughout the continent are no longer plagued with problems over parking.

So said Swen Nielson, president of the International Association of College and University Security Directors at their annual conference here last month.

"Parking used to be a big deal. Now we've changed to drugs and personnel problems. We haven't discussed parking—I think that's a healthy sign," he said.

Nielson was speaking at a press conference in the Commons building June 17.

He said there had been no general discussion on campus disturbances. "I think we've exhausted this."

"This year's meeting has been more management-orientated."

Nielson said in his seven years of attending such conferences they had transformed from a "nuts and bolts type conference to being more management orientated."

Topics of discussion for next year's conference will be decided from the results of a post-conference questionnaire to be sent to all delegates.

Nielson said he felt campus police should take on more of the functions usually handled by municipal police especially in areas where the university population is larger than the community.

"But I don't think there's a university that wouldn't like to get out of the police business."

Nielson also said he felt Canadian campus security officers faced the same problems as their American counterparts "to the exclusion of disturbances."

"The issues aren't here like the war and the draft," he said.

"Students look at us as their adversary," he said. "It's not so. A lot of understanding could be fostered between us and them."

Tom O'Connor, Uvic's traffic and security chief, and his wife Tess hosted the twelfth annual conference of the IACUSD which has 325 members. Approximately 160 members were represented at the conference out of which 15 were from Canadian campuses.

Police Say Molotov Cocktails A Bummer

An overwhelming majority of delegates to the 12th annual conference of the International Association of College and University Security Directors have experienced an incident involving an incendiary or explosive device on their campuses.

This revelation from 150 of the 163 delegates came out during a presentation on incendiary and explosive devices put on by Lieutenant J. J. McCarthy and Sgt. H. L. Schneider of the Seattle Police Department.

Schneider first described some of the explosive devices, fuses, and triggers his department had come across, including dynamite, T.N.T. and a mousetrap rigged to set off an explosion upon the opening of a door or the moving of a chair.

"The increase in thefts from (U.S.) Armed Forces' arsenals increased 500 percent in 1969 over 1968", he said.

Schneider indicated he treated any suspected explosive device with respect. "I'm afraid of them", he said.

Incendiary devises were then explained by McCarthy. These ranged from Molotov cocktails to a bottled mixture of common ingredients he said are found in the home.

McCarthy said, "Every individual has a characteristic way of setting the wick in a Molotov cocktail". One Seattle fire-bombing group went so far as to publish a pamphlet on the manner in which to set the wick. The method was incorrect, but the pamphlet led to the arrest of the publishers who had lobbed some of their useless Molotov cocktails at police.

"I'm afraid of them", McCarthy said, "but our function in handling these

maintain files on sources of information on pollution, interpret technical data to the layman and relate it to Regional problems,

encourage public awareness of ecology, of man's dependence on other living things, act as a coordinating centre for community groups and individuals, public lists of information sources, fact sheets of environmental data, bibliographies, etc. stimulate public interest in the environmental service offered by existing agencies.

A core committee of CCEC meets every Tuesday in the SUB

Anyone who wishes to help Environment 100 financially can become a "Friend of the Environmental Centre" by sending a donation in any amount to the CCEC office.

Anyone wishing to do volunteer work for the group should call 477-8415.

Day Care Centre Offered

A baby-sitting service is being offered for married summer school students who wish their offspring looked after during classes.

This service is available Monday through Friday at

a centrally located Oak Bay home not too far from the campus.

Rates are reasonable.

Persons interested should phone 385-3685 and ask for Pat.

Prize Offered In Directory Contest

The first AMS sponsored contest of the summer session is officially underway as of today.

The Publications department is looking for a new name for the campus telephone directory, previously called the Blue and Gold.

Students and faculty are urged to submit ideas in writing to the SUB general

office before July 20.

The directory, published annually, contains listings for all students, faculty, and administration staff on campus. This year for the first time there will also be a yellow pages advertising section.

The prize for for the best name has yet to be disclosed.

STUDENT LIBRARY CARDS

1969-70 ID cards will still be valid as library cards through Summer Session. Therefore, no new library cards will be issued. If a student has lost his ID card he can apply at the Circulation Desk for a temporary library card.

Library cards for Summer Session students not previously registered for the 1969-70 session will be available on request at the Loan Desk.

LOAN PERIODS

The regular loan period to undergraduate students will be two weeks. However, if an item is requested by another borrower it will be recalled at the end of one week.

Loans to students registered in the Faculty of Graduate Studies will continue to be for a four week period but will be subject to recall after one week, during Summer Session, if an item is needed by another borrower.

The co-operation of all library borrowers in returning promptly all requested materials will be appreciated by the Library staff and will be beneficial to all.

McPHERSON LIBRARY SUMMER SESSION SERVICE HOURS

Never used the McPherson Library? Attend some of our general tours and listen to the latest "music", see micromaterials and the oldest (1502) book in the Library. Had trouble obtaining library materials in the past? Attend our subject briefings for useful, time-saving information. (Please sign up ahead of time at the Library Information Desk for the subject briefings since the groups will be limited to about 20 people). Know all about the Library? Prove it by answering the quiz available in the Library and checking your answers on the back.

SCHEDULE FOR TOURS: JULY 2 - 10 MONDAY TO FRIDAY

There will be four general Library tours per day starting at the Information Desk at:

- 9:00 a.m.
- 11:00 a.m.
- 2:00 p.m.
- 4:00 p.m.

These tours will last about 40 minutes.

Construction Problems Force Biology Complex Postponement

The new biology building will not open on schedule, due to the present lock-out - strike situation in B.C.'s construction industry.

The building has been almost at a standstill as far as construction is concerned since the lock-out started," said Art Webb, director of campus planning. The construction lock-out has been in effect since mid-April.

The building "Certainly won't be completed by September," continued Webb. Estimated completion date is now, "Probably late October or early November."

The building consists mainly of office and lab space. There are only two 50-seat and two 30-seat classrooms, plus four seminar rooms. The building will be devoted entirely to Biology. Some sections of the Biology Department will remain in the Elliot Building. The space in Elliot opened up by moving parts of the Biology Department will be taken over by the Physics and Chemistry departments.

Students Advocate Capitalist Adventures

A proposal has been made for the establishment of a student corporation at UVIC.

At present, the President of the University is considering a brief which requests a research grant to look into the feasibility of such a business.

A student corporation is a business like any other business but with one important difference. It is incorporated under the Societies Act as a non-profit business. All profits are fed back into the corporation for research

and expansion, or, put into a scholarship fund.

The two reasons for a student corporation are paying student salaries and providing students with business experience.

The business community has shown great enthusiasm for the idea and are willing to provide any advice that might be useful.

Anyone wishing to become involved in the corporation or wishing further information should contact Dave Inkster at the SUB - 477-1834.

Tuesday Break Fades Into Oblivion

Uvic students will no longer enjoy a two hour lunch break on Tuesdays.

Starting in the 1970-71 winter session, classes will now be scheduled for Tuesday at 1:30 and also for 12:30 every day.

"The main choice is to schedule into the lunch hour or extend into the day," said Trevor Matthews, assistant to the president.

He added that although most students would probably choose the latter, they would decide otherwise when faced with a 7:30 a.m. or 6:30 p.m. class.

Matthews said there are two main reasons for the

move: first, there are more students in the university, and second, there are more courses being offered. Coupled with these factors, there is no significant increase in classroom space over last year.

The result should be that classroom sizes will not alter appreciably from last year.

The Tuesday slot was filled by moving a class previously scheduled on Friday afternoon to Tuesday. The 12:30 classes constitute a new sequence of classes, and are expected to take up the slack in timetable openings required by increased

students and courses.

It had been found over the past few years that late Friday afternoon classes had often been moved informally to earlier times. As a result, classes starting at 1:30 on Tuesdays had become increasingly frequent.

One problem yet to be ironed out is the extra-curricular activities which have in past years been held during the noon hour. Another new sequence for next year is the opening of 3:30 - 5:00 periods twice-weekly for classes consisting of two one and a half hour seminars.

Explosives cont' from page 1

McCarthy told the delegates that prior to the meeting he had placed three dummy explosive devices around the room. He then requested the delegates to locate the devices. The delegates could not. The devices, all of which were in plain view of all of the delegates, turned out to be, or at least appeared to be, a book, a cigar box, and a small cylinder, all relatively unobtrusive.

I SAID KEEP ON TRUCKIN'...

Student Mandarins Summer Proposals Useful In Long Run

A brief on the A.M.S. Communications Committee will be implemented "come hell or high water."

At least that is what Communications Director Greg Fraser said when discussing the "Task Force on Planning" June 23rd.

Fraser is one of four Executive Council members being employed by the A.M.S. for the summer to work on student affairs.

Most of Fraser's time has been spent working on the Communications Committee and a student affairs survey.

In a brief on his Communications Committee Fraser outlines a sub-committee structure that is designed to, among other things, revitalize the A.M.S. and university committees. When asked if the brief would be implemented he said: "It will be implemented by me come hell or high water."

The student affairs survey, which will be distributed during registration, is going to be of more value this year. The results, as well as some student council opinion regarding priorities, will be issued prior to the October council elections in an attempt to better acquaint students with the A.M.S. and some of its problems.

Fraser has also been working on Frosh Orientation and Shinerama.

The Representative Assembly originally adopted the idea of the Task Force last April in the hope that it would result in a more effective student government. To that end Task Force members agree that, in the long run, the venture will probably prove successful.

Fraser believes that the Task Force has been "worthwhile." He maintains that as a result of it the traditionally slow start of the student council each September will be largely eliminated. "The four of us will know what's going on; we'll be on our way," he said.

A.M.S. Campus Co-ordinator, Rick Calderbank, said: "I think the Task Force will prove to be of benefit to the students in the long run."

This year three times as much advertising has been sold for the student phone directory, yet there is still no reduction in its 25 cent per copy cost. "I hope that with the advertising and sales revenue that neither the Handbook nor the Directory will need any A.M.S. subsidy," said publications director Deryk Thompson. Thompson also stated that credit for the increase in advertising revenue should go to Don Johnson.

Calderbank has been busy with student unemployment, housing and SUB expansion. Regarding unemployment he feels his main contribution has been to help create public awareness of the problem.

The decision on SUB expansion now rests with the Physical Planning Committee, a sub-committee of the Board of Governors. They have requested a meeting with council members for sometime in July.

"The meeting is just to get the general feelings of kids on council," said Calderbank. After the meeting a decision is expected to be handed down on the future of SUB expansion.

A.M.S. President Robert McDougall, besides heading the Task Force, has been working to strengthen administration-student ties, writing a history of the UVic A.M.S., chairing the Birth Control Committee, and re-organizing the SUB's filing system.

Collectively the Task Force has been screening applicants to succeed Dick Chudley as A.M.S. Executive Secretary.

Task Force members are: President Robert McDougall, Pubs Director Deryk Thompson, Campus Co-ordinator Rick Calderbank, and Communications Director Greg Fraser. Academic Affairs Chairman Brian Green was also employed, but only until July.
